# DIAGNOSTICS HARDWARE KIT

## For Australian Fleets & Workshops

Introducing our Diagnostics Hardware Kit – the advanced trailer diagnostics solution for Australian fleets and workshops.

### Next-Generation Compatibility

Built on a state-of-the-art diagnostic platform, the kit is hardware compatible with ECUTalk and ACOM AE, ensuring seamless integration with your existing systems.

### Flexible Software Access

Subscription-based model, including an initial trailer software licence with 12+ months of access from day one.

### Future-Ready Design

Engineered to support the next-generation iTEBS X, providing long-term value and scalability for evolving fleet needs.

### Seamless Access & Support

Available through your local Trailer OEM or TruckServices Expert Network partner, ensuring convenient access and trusted support across the region.

**Part No. CV1199**
